Clinical Experience

Consultant (Vinoba Bhawe Civil Hospital): Unit Head and Managing Out Patient Department along with all emergency admissions. Care of all admitted surgical patients and patients in surgical ICU.

- Performing General and Laparoscopic Surgical procedures independently.
- Managing Trauma Patients.

Surgical Registrar at Rasoni Hospital: This is a 30 bedded private hospital equipped for general surgery, GI surgery including laparoscopic work, GU surgery, acute & trauma work and has a two bedded HDU.

- Assisting in all elective (open and laparoscopic) and emergency operations.
- Pre and post operative management of patients

Registrar (Casualty & Surgery) at Sir. H.N. Hospital & Research Centre:

- Assisting in all elective (open and laparoscopic) and emergency operations.
- I was responsible for managing emergency admissions across all specialties. This job also enabled me to interact with various senior consultants.

Senior Resident at B. Y. L. Nair Hospital:

- Pre and post operative management of patients in the wards and follow up of operated patients and assessment of new patients in clinics.
- ICU: Post operative management of all adult/ paediatric cardiac and thoracic surgery patients including management of ventilated patients.

Junior, Senior & Chief Resident (General Surgery & allied branches) at J.A. Group of Hospitals, Gwalior, India:

- As a **junior resident** I was responsible for managing preoperative and postoperative patients in the ward and all the emergency admissions on two on call days every week. I assisted a wide range of general surgical procedures during this period and started performing minor procedures under appropriate level of supervision.
- As a **senior resident** in the second year of training I started spending more time in operating room and started performing inguinal hernia repair, hydrocele repair, sigmoidoscopy, cystoscopy, cystolithotomy, and urethral dilatations. I was first assistant for appendectomy, nephrolithotomy, ureterolithotomy, TURP, Freyer's prostatectomy, optical internal urethrotomy, laparoscopic and open cholecystectomy, hemicolectomy and other G.I. procedures. I was also involved in various emergency procedures.
- The second year also included 4 months in neurosurgery. Here I participated in management of head injury and elective operations like shunts, tumour excision and spinal surgery.
- As a **chief resident** I started doing more complex surgical cases under appropriate level of supervision like appendectomy, nephrolithotomy, ureterolithotomy, TURP, Freyer's prostatectomy, open cholecystectomy, hemicolectomy and other G.I. procedures.
