## Research

- Title:** Maternal and foetal outcome in pregnancy with diabetes.
- Aim:** To study the effects of diabetes on mother and foetus during ante partum and Postpartum period. (March 2003 - April 2004)
- Methods:** One year study of 50 cases, conducted at the Seth G.S. Medical College and KEM Hospital in the department of OBGY and Endocrinology.
- Outcome:** Diabetes in pregnancy was associated with increased maternal and neonatal morbidity and mortality.  
This was submitted for Fellowship examination (FCPS) by the College of Physicians and Surgeons of Bombay and was accepted.
